

# **Chobot Consulting**

## **What We Offer**

### **1. Project Coaching & Sparring**

Structured 1:1 or team coaching sessions focused on clarity, decision quality, risk reduction, and leadership effectiveness. We help project managers and sponsors think sharper and act faster.

### **2. Project Start Blueprint**

Design your project properly from day one. We facilitate scope framing, stakeholder mapping, risk structuring, governance setup, and lifecycle selection (predictive, agile, or hybrid).

### **3. Project Health Check & Reset**

When projects drift, we diagnose root causes. Structured workshops identify bottlenecks, unclear roles, hidden risks, and misalignment. We define corrective actions with measurable impact.

### **4. Discussion & Decision Workshops**

Facilitated sessions using structured methodologies to drive alignment. We transform meetings from opinion exchanges into decision-making engines.

## 5. Lean & Process Optimization

Value stream mapping, waste reduction, PDCA cycles, and performance improvement aligned with strategic objectives.

## 6. Governance & Risk Frameworks

Clear role definitions (Sponsor, PM, Owner, SME), risk registers, decision logs, RACI structures, and reporting dashboards tailored to your environment.
